

Farm Progress Tech Forum

Insight, Strategy, Precision For Profitable Farming

The **Farm Progress Tech** Forum gives producers access to industry-leading precision ag equipment, products and services, ideas and resources to help them integrate and upgrade their production practices and operational data to further optimize their bottom lines.

Attendees will walk away with immediate real-world action items to implement, while gaining a better understanding of where precision ag is headed in the coming years.

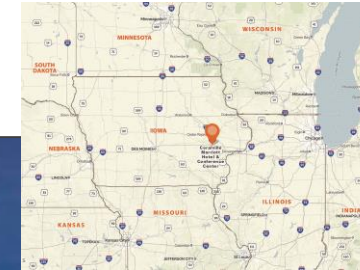

- 2016 & 2017 Ag Data events hosted attendees from 29 states
- Targeting large-acre producers
- Two day, editorially driven conference led by Corn+Soybean Digest and Farm Futures
